FOUR MORE COVID-19 POSITIVES IN JACKSON COUNTY

Jackson County Health Department was notified in the past 24 hours of four new confirmed cases of COVID-19. These cases include the following:

- A female in her forties, who acquired the disease locally, is isolated at home and doing well;
- A female in her thirties, who acquired the disease locally, is isolated at home and doing well;
- A female in her twenties, who acquired the disease locally, is isolated at home and doing well;
- A female in her eighties, who acquired the disease locally, is isolated in a long-term care facility and doing fair.

To date, there have been 16 total laboratory confirmed positives of COVID-19 in Jackson County, including one death. Four individuals have recovered enough to be released from isolation.

Public health officials are investigating these cases, speaking with positive individuals about who they may have encountered before this diagnosis. Through investigation, public health may place other individuals on home quarantine if they are determined to have had significant exposure. Such individuals may not be symptomatic, but are quarantined for a period of time which allows symptoms to develop and pass, without posing risk to others. If you are contacted by public health officials, please respond promptly.

Health officials expect more cases to be confirmed locally in coming weeks. The number of cases can be reduced by adhering to the Governor's stay at home order, washing hands frequently, disinfecting commonly touched surfaces, and maintaining space from others when in public.

COVID-19 shares many symptoms with more common respiratory diseases. If you have a fever, cough, or difficulty breathing, call your health care provider for further guidance. In addition, Southern Illinois Healthcare (SIH) has established a 24-hour COVID-19 hotline at 1-844-988-7800. Clinicians there will answer questions, assess each caller and advise on next steps for evaluation or potential testing.

Follow the websites and social media accounts of Jackson County Health Department, Illinois Department of Public Health and CDC for trusted information on this pandemic.
