EIGHT ADDITIONAL COVID-19 POSITIVES IN JACKSON COUNTY

Jackson County Health Department was notified in the past 24 hours of eight Jackson County residents confirmed to have contracted COVID-19. The individuals are as follows:

- Female – three in their twenties, and one in her sixties;
- Male – one in his twenties, one in his fifties, and two in their sixties.

These individuals acquired the disease either through close contact with a known case, or through transmission in the community (i.e., unable to trace back to a known source). They are being placed in isolation.

To date, there have been 210 laboratory confirmed cases in Jackson County, including ten deaths related to the disease. A total of 168 individuals have been released from isolation, in accordance with CDC guidelines. Thirty-two active cases are currently being managed.

People can reduce the likelihood of contracting the disease by adhering to the Governor's stay at home order, washing hands frequently, disinfecting commonly touched surfaces, wearing face coverings when inside public spaces, and maintaining space from others as much as possible.

COVID-19 shares many symptoms with more common respiratory diseases. If you have a fever, cough, or difficulty breathing, call your health care provider for further guidance. In addition, Southern Illinois Healthcare (SIH) has established a COVID-19 hotline at 1-844-988-7800, which is open 8am – 8pm. Clinicians there will answer questions, assess each caller and advise on next steps for evaluation or potential testing.
